MEMORANDUM

Hays, Kansas
67601

To: Dr. Tomanek Date: Oct. 2, 1978
From: Ron Pflughoft Subject: land-fill for Rarick

Pierce and Schippers need 11,000 cu. yards of dirt to fill in the present hole and build up the ground level four feet to raise Rarick Hall above the flood plain. The dirt will be taken from a draw west of Big Creek south of the city route and east of the by-pass. At the present time the only vegetation growing in this draw is grass. The plan is to skim off 25 ft. on the east side of the draw. Dr. McGaugh has been unable to plant anything in the draw because of the high ridge. After the ridge is flattened it will give Dr. McGaugh an additional one-half acre to farm. We will be losing some top soil - but this may be the only available land-fill dirt without going a great distance from the University. Our contract provides dirt for Rarick - so am assuming we will be unable to charge Pierce-Schippers. It is my understanding Dr. McGaugh was informed of this matter at an earlier date. We should also be aware of the fact the nursing building will require 4 - 6,000 yards of fill dirt.
